# VS-Code Prettier Setup

Prettier Setup

- Navigate to the Extensions tab in VS-code and search for "Prettier" and you should see "Prettier - Code formatter"

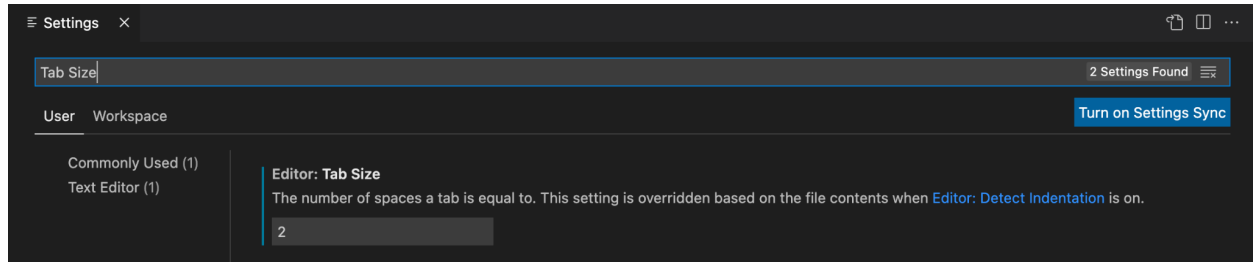

- After installing we will need to enable it as the default formatter
- On the top navbar click the "Code" dropdown menu
- Scroll over "Preferences", and select "Settings"
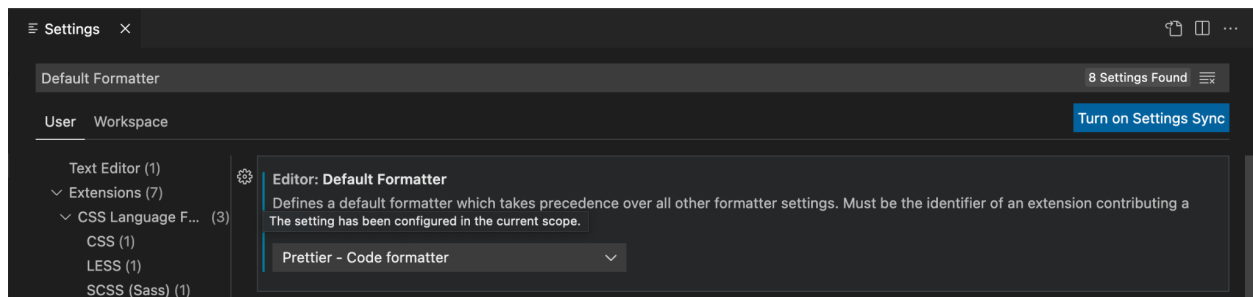

Prettier/VS-Code Configuration

Tab Size

- In the settings search bar search for "Tab Size" and make sure that is set to 2

Default Formatter

- Search for Default Formatter
- You will see a Dropdown menu and need to search for "Prettier - Code formatter" and select it.

Format on Save

- Search for "Format on Save" and make sure the box is checked
